RE: Self criticism around BC suspension.

Last night I discovered that I have basically been running deceit and misdirection to avoid organizational accountability for my practice as BC HH representative. Specifically, I have been misdirecting my disrespect of NB procedures on BC not adhering to a schedule. But I found out last night when I finally investigated that BC announced a schedule last June of meat orders every 3 months. Moreover, this was on the same notice that laid out the other procedure I violated and another one I almost violated last night until stopped by 206.

It is clear that I dumped the notice in the file without paying any attention to it.

It is also very clear that the problem is internal to me and I have been trying to misdirect, rationalize and make excuses to preserve my inflated commodity value.

My analysis is still that the PC is what I posed last night, but there is no basis for a criticism of BC, that is all misdirection. The PC is personal solution. I value my personal solutions more than organizational methods such as BC and when I can't accomplish a personal solution I become frustrated and subjective.

The effect of my practice has been to put down BC to attempt to preserve my inflated CV. This has materially hindered socialization of HH finances.

The following steps would seem to me to be minimal:

1. There should be some material response from other HH members such as boarding.
2. I should be replaced as HH representative although I may be assigned to fill out forms for practice.
3. It is critical to take steps as suggested on Monday to reduce my CV inflation such as practice in areas where I am weak and others are stronger, where I can be conditioned.

The accompanying self criticism will go to BC, and both will be centralized.

RE: Response to H-002 suspension from BC

This is an overdue response to the H-002 suspension from BC because of my disrespect of BC procedures.

Between the suspension and now, I have run deceit and misdirection in the HH regarding the ideological basis of my error. I am enclosing a copy of the misdirection as well as an accompanying self criticism to expose the particularity of the case.

The seriousness of it is that I have materially upheld private property over socialized property and materially hindered socialization of organizational finances by casting false charges against BC as well as consistent disrespect of and resistance to connection with BC.

My recommendations are enclosed.
